PRECIS AND COMPOSITION PAPER

QUESTION # 2.

TITLE: RENEWABLE ENERGY AND
ITS CATASTROPHIC EFFECTS.

Renewable energy is widely considered as an antidote for the fossil-fueled past as it would help reach carbon neutrality. In reality, it is exhausting the planet. The renewable energy technology demands extraction of rare minerals leaving vast lands barren. Similarly, the sustainable technology like Electric cars produce more carbon than ordinary cars, adding more to pollution and electrical waste. The zero emission idea by operating solar and wind mills is deceiving as it adversely affects ecosystem and heavily rely on fossil fuels for its operation. Thus, the green revolution is a rhetoric used leading to another industrial catastrophe, wounded the planet like never before.

QUESTION # 3.

1. ANSWER (1).

Timothy Dexter's rivals advise him to ship coal to Newcastle, England. It was a city already famous for coal production. The rivals believe that the ship would not make any sale as the city was already rich in coal. However, there was a strike going on that stopped the local production. Hence, consumers bought from Dexter's ship resulting in a win, crushing rivals' plan.

2. Answer (2)

The unexpected outcome in England transformed Dexter's apparently foolish coal venture into a profitable success as the city was facing a strike. He initially considered foolish for sending a cargo to a place that abundantly produced the product he was shipping met with an alternative fate. The local consumers bought aptly from his cargo, due to the ongoing strike, making him a business genius.

3. Answer (3)

The author implies that luck and

Intelligence can be like two faces of the same coin. It is not necessary for one to have both, either side, would play it's role. Luck, obviously, would play a better role even for a foolish person.

4. Answer (4)

Dexter's repeated success in turning mockery into profit challenge conventional ideas about business and wisdom as his powerplay was luck and being underestimated by his competitors. One doesn't need to have wisdom and intelligence rather a vision to turn anything into profit.

5. Answer (5)

Dexter's rivals considered him a "fool" and a "genius". He was considered foolish for ~~doing~~^{making} the most common mistake in system i.e. to send ship to a land that produces the product. However, he was considered a "genius" for sending it at the time it was needed most. Similarly, shipping rats to a country where they are in high demand and making profit from it.
