English Precise and Composition

Test - 01

Date: 30-10-2025

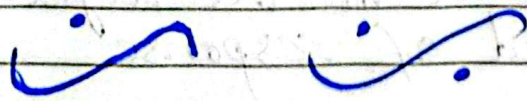

Question No: 02

- 1) The author traces the evolution of the concept of intelligence by associating intelligence with wisdom for centuries, measuring one's ability to calculate, plan and execute efficiently during the industrial age and redefining intelligence in the digital age as speed of response.

2) The author conceals a danger in valuing speed over reflection that we risk confusing reaction with understanding. A person may answer ten questions quickly but may not be able to answer one compact answer. It develops a skimming and scrolling rather than reading and thinking.

3) Technology provides access to vast knowledge, but hinders human capacity to turn that knowledge into wisdom. As technology flourishes with unlimited information within seconds, however, makes humans feel, think and reflect over ideas already available at hand.

4) According to author, the most valuable kind of intelligence in future will be able to interpret, connect and understand the ideas, facts and data. Intelligence must rediscover the moral and social values and aspects.

Question No : 01

Precis Title: Nature of Scientific Understanding

Precis:

A physics tutor gave an experiment by throwing a feather and a hammer in a vacuum chamber which proved that heavy things do not fall faster than light ones. It widens the understanding of students about the concept of gravity and nature of evolving science. The uncertainty about nature of scientific understanding prevails because schools often focus on rote learning rather than creativity and completion of course over exploration of new ideas, teaching students to find correct answer than search for better questions.

The publications of medical field face conflicting

findings owing to its complex nature. This uncertainty does not lie in science but in ways how knowledge progresses. As the scientific methods need solid evidence, review and constant questioning. However, new ideas to challenge the existing ones bring a shift in thought. The nature of science evolves gradually and its acceptance leads human to understand it.

Question No: 03

- 1 (A)
- 2 (B)
- 3 (C)
- 4 (B)
- 5 (B)
- 6 (B)
- 7 (D)
- 8 (C)
- 9 (C)
- 10 (B)
