to fossil fuels. However, beneath this appealing image lies another story of exploitation and environmental harm. The production of solar panels, wind turbines, and electrical vehicles, batteries demands large quantities of rare earth metal such as lithium and cobalt. Their mining damages landscapes, pollutes water, and exploits poor communities. Manufacturing these components also release harmful emissions, while their disposal creates serious wastes and recycling problems. Although renewable promise clean power, their life cycle depends upon fossil fuels and produce waste that cannot be damaged managed. Modernity lies in call for systemic moderation rather than

Q: 03:

(Comprehension)

Passage: Dexter's coal
Story.

(Answers)

① His rivals wanted to
ridiculed him since Newcastle
was rich in coal, sending
coal there seemed foolish.
They expected that this
venture would ruin him.

② A miners' strike in
England caused shortage
of coal. As a result, Dexter
sold his shipment at very
high price and earned
great profit.

③ It was mainly due to
luck. The strike was
unexpected and turned
his apparently foolish plan
into successful business.

deal.

④ It shows that success always does not depend on education or business logic. Sometimes chance and circumstances play a great role than experience.

⑤ People often judge others by circumstances and appearances. What looks foolish may turn out to be wise when fate changes. Success can turn a "fool" into a "genius overnight".

asking her to explain
verses of Ghalib. But
comprehension and creation
are two different things.
Understanding is work
of reason, while poetry is
born of inspiration. Ghalib
greatness was not result
of mere study or labour;
it was divine gift,
a reflection of insight
that cannot be achieved
by efforts alone. His
poetry belongs to world
beyond ordinary imagination
- a blessing that turns
his art into immortality.
