

Precis and Composition (Mock - 4)

Q no: 2 The Deception of Green Energy

05/20

Title: The Hidden Cost of Green Energy

Overall understanding of the idea is ok
Title needs improvement
Grammar is ok

Renewable energy being humanity's moral redemption emerged as replacement for fossil fuels, yet its costs remain largely concealed. Solar energy, wind energy and electrical vehicles seem combustion free promoting carbon neutrality. On the other hand, it also demands huge amount of rare-earth minerals, cobalt, and lithium extracted through ecological harmful mining from underdeveloped countries for its production to be called as sustainable renewable energy resource. These replacements of fossil fuels highly rely on manufacturing, maintenance and transportation despite being branded as 'zero-emission'. This green revolution often substitute one form of environmental harm for another. True sustainability requires moderation, ethical restraints and systemic humility rather than industrial exploitation disguised as environmental virtue. Humanity's pursuit of green progress risks wounding the planet anew instead of healing it.

Write clear and short sentences
Avoid complicated sentences

Precis should be one 3rd of original passage
Your passage reflect the original idea
Don't take direct sentences from the passage
It is not the narration do precis
Title should be self-defining and self-explanatory to the passage
Make a Precis in Single Passage
Always write in third person

Total word = 128
count

Answer #1 Timothy Denton rivals advised him to ship coal to Newcastle, England a city rich in coal supply to mock and ruin him financially. They believed he would suffer a huge loss by selling an abundant resource where it wasn't needed. The suggestion was an attempt to humiliate and expose his foolishness in business.

Answer #2 Denton's apparently foolish venture turned into a profitable success when miner's strike in Newcastle halted local coal production creating sudden shortage. This sudden demand allowed him to sell his entire cargo for a massive profit transforming joke into a profitable success.

Answer #3 The author implies that Denton's success stemmed from luck and unconventional intuitions rather than formal intelligence. His fortune suggests that sometimes luck complements bold decisions and not always the calculated.

logic or education.

Answer #4 Dexter's repeated success defies traditional business wisdom and education. Despite lacking formal training, by being confident, daring and perfect timing, all contribute success.

Answer #5 From the rivals perspective it can be inferred that society often link wisdom with success and bad luck and hardship with foolishness but Dexter's success reveals that the line between foolish and genius is often drawn by human's perception and in reality there is no such thing, what seems absurd may under fortunate circumstance become success.

Q no: 4

8/10

i) we accepted their offer on the ground that something is better than nothing.

Corrected: We accepted their offer on the grounds that something is better than nothing.

The president gave a laconic speech, using only few powerful words to convey his message.

Attempt in idiomatic and proverbial manner
Focus on grammar please
Do not attempt word by word

Ques 7
If an Urdu professor claims that he can very well understand Ghalib's discourse and can capture atmosphere by thoroughly discussing his artistic excellence then no doubt he is demonstrating his knowledge capacity. But if he is demanded to produce one verse like Ghalib then he will surrender. Because understanding and invention is two different worlds. Understanding is a product of mind however invention is the result of intuition. The status which Ghalib was bestowed was not only due to the studies and hardwork but is the proof of unusual intelligence, feeling and God's blessing. This is the reason that after centuries his verses create impact on the hearts as in his own period.
