Question: 1

Make a precis of the following passage and suggest a suitable title.

The Deception of Green Energy

The Hidden Tolls of Renewable Energy

05/20

In people's mind, renewable energy is seen as a moral solution to replace harmful fossil fuel past. Therefore, leaders, companies and environmental group use words like "carbon neutrality" and "net zero". However, behind lies a troubling truth; green revolution heavily depends on mining rare minerals such as lithium and cobalt, causing environmental crisis, especially in poorer regions such as Congo, Chile and China. Electric vehicles, for instance, have been glorified as eco-friendly yet, releases more carbon emission during battery production and very difficult to recycle. Similarly, wind and solar farms being clean in operation but they still have hidden environmental costs. Thus, the concept of "zero emissions" is misleading. The true problem is not just in technology but humanity's obsession with "green labels" has turned environmental care into marketing rather than genuine commitment. Renewable energy rather than healing the planet, causing harm in different ways.
