-: Green-energy ; A Facade ?-q?

Renewable energy has been celebrated as a win against fossil fuels. It has been glorified, while in reality it is exploiting our planet. Green energy is produced by vast amount of rare-earth minerals damaging a huge vast land. Batteries of electrical vehicles emit more carbon than engines, and have limited battery life, produce electronic waste and, a challenge for recycling, and are in name of progress. Wind turbines, Solar farm and Solar plates also have recycling concern, and production of toxins, while extremely depending upon fossil fuels. Today's humanity's love for ~~Green~~ product and inability to understand this marketing is dangerous. The true path is proper measure ~~but~~ not another way to ruin world, under differed table. :- TRANSLATION :-

if any Professor claims that he can understand the discourse of Ghalib very well and can have long conversation on his poetic skills, thus indeed he is showing his qualificational limitations?

But if he ^{would have been} is demanded with a verse like Ghalib he would ~~has been~~ become helpless. Because under-^{intuition}standing and creation are two different worlds. Under-standing is the production of ~~brain~~ ^{brain}, while creation is the result of inspiration. Ghalib didn't have this level because ~~be~~ of effort and because ^{of} education, but due to an extra-ordinary intelligence, feeling, ~~due to~~ and God's will. Thus is the reason

that even after centuries his poetry affects the people ^{in the} same way ^{as} it used to do in his time.
