Read the passage carefully

Ans-

Timothy Dexter's rivals advise him to ship coal to new castle because they were jealous from his success and wanted to humiliate him. Their intention was Timothy Dexter can lose everything.

Ans 2

When Timothy's ship reached England, he saw sudden shortage due to the protest of miners that stopped local production. So he sold his entire cargo with massive profit.

Ans 3

Sentence Structure

The author implied about the relationship between luck and intelligence in Timothy Dexter's success as sometimes, being under estimated is the best advantage a man can have.

Q4:

Dexter repeated success in turning mockery into profit challenge. He once sent bed warmth to Caribbean, and islanders bought them as maddies' ladies. Another time he shipped rats to West Indies to control rats and earned another profit.

~~Q5: It is a saying that ...~~

It can be inferred about human perception of "foolishness" and "genius" that sometimes being underestimated is the best advantage a man can have.

~~Q7~~

Translate the following

Q1: Translate the Following

04/10

If any Professor of Urdu claims of having well knowing knowledge of Ghalib's poetry and that he can measure his talent through a conventional scale, he would be perplexed and failed, if he demanded to say the same ^{verse} speech like Ghalib. Because wisdom and creativity are two different aspects. wisdom ^{is production of} comes from intelligence and creativity is result of divine. The status that Ghalib gained is not only due to study and hardwork but from an extra ordinary intelligence, sense of care for others and gift of God. This is the reason, after centuries this poetry mesmerises same

Precis

The Deception of Green Energy

Title : Renewable Energy and Sustainability

Overall understanding the idea is ok

Title needs improvement.

Grammar is ok.

06/20

Renewable energy is widely considered as humanity's remedy for climate change, with promise of carbon neutrality and sustainable future. However, this optimism masks significant environmental and social costs. Technologies like solar panels, wind turbines and electric vehicles batteries rely on the extraction of rare earth minerals, cobalt and lithium which devastates ecosystems and displaces vulnerable communities in resource rich but impoverished regions. Electric vehicle battery production emits substantial carbon and recycling challenges. On the other hand, wind and solar infrastructure eventually stop into toxic waste. Moreover, the production and maintenance of these clean technologies still depend on fossil fuels. Thus green revolution though marketed as sustainable, often sustains cycle of extraction, pollution and ecological harm. True environmental progress requires restraint efficiency and humility rather than industrial exploitation disguised as a moral virtue.

Focus on clarity, logical flow and Avoid disjointed sentence

Write clear and short sentences

Avoid complicated sentences
