The Deception of Green Energy
Renewable Energy: A Disquieting Paradox

05/20

Renewable energy is often portrayed as a moral solution to the problem caused by fossil fuels, with terms like "carbon neutrality" and "net zero" being

beneath this positive image lies a concerning paradox: The push for renewable energy is harming the planet through mining and wasting. Technologies like solar panels, wind turbines and electric vehicles require large amount of rare minerals extracted through harmful mining practices. Electric vehicles batteries production emit more carbon than traditional engines. The focus on green labels has turned environmentalism into marketing tools rather than genuine effort.

True sustainability requires restraint

If a professor of Urdu claims that he understands Ghalib poetry well and can discuss its artistic excellence fluently then he certainly possesses commendable intellect. However if he is asked to write poetry like Ghalib, he will be rendered speechless - because wisdom and inspiration are two different realms. Understanding is the product of intellect, while creation is the outcome of divine inspiration and spiritual enlightenment.

Write in single passage

Ghalib was blessed with rare degree of that divine gift - his poetry was not the result of mere profound sensitivity, and heavenly inspiration. That is precisely why, even after a century, his couplets still move hearts as deeply as they did in his own time.
