

Topic:

Women Empowerment

Men and women are like the tyres of bicycle, as bicycle can't be driven if one tyre is removed, similarly man without woman is nothing and vice versa. This famous statement depicts the importance of women in any society. Still, women especially in 3rd world countries are not being empowered in a way they should be. According to Global Gender Gap Report 2022, Pakistan ranked 145 out of 146 countries, which is alarming and unacceptable. On contrary to this, India was ranked at 135 - slightly better than Pakistan. Similarly, according to the UN recent report, 48 percent of women in Pakistan have no say in their health matters. This shows that Pakistani women are more prone to diseases like depression, anaemia, hepatitis and pregnancy problems - leading to ~~the~~ one of the highest mortality cases during the child birth. So, there is a need to address this issue as early as possible or otherwise it will be too late. This essay will explore the situation of women across various departments and context and will suggest possible solutions and opportunities.
