

Title: Benefits Of Informal Learning And ~~The~~ Diminishing Trends

Man does not only learn from classroom and teacher but he also gains knowledge from informal settings. Informal settings are unorganized set ups for learning skills. For instance when people work together they usually talk about political, financial and family issues. Although, knowledge is not transmitted in a sophisticated manner. In daily life family gatherings, social groups and community programs are informal settings, which develop skills of cooperation, communication and judgement in participants. People have different opinions due to different exposures. But they resolve differences and adopt alternatives. Moreover, they foster confidence, interdependence and also work in unfamiliar circumstances. Informal learning enhances knowledge of man. A person who works for solutions to problem, has awareness about needs

of society. But today physical interactions have been limited which suppress spread of knowledge and reduce capabilities of individuals.
