Essay

After World War 2, the establishment of international organisation i.e. United Nation ^{set} the foundation of modern concept of human rights. These human rights includes the individual rights to freedom of speech and freedom of expression. which continued for the digital world as well. But along with a spread of digital or social media accounts, challenges also gain spikes. Digital freedom refers to the freedom to access information, access the internet and digital platform freely, and to express opinions online without undue censorship, surveillance or discrimination.

DATE: ___/___/___

Whereas, digital responsibility means ethical ^{and lawful} use of digital technologies. However, in Pakistan, with increasing numbers of digital technology users, challenges stemming from them are also elevating. Some of these challenges are spread of mis-information and false news, online harassment, data breach and extremist content. Nevertheless, the awareness about the challenges and is limited. Therefore, state level engagement is necessary in order to address these challenges. Hence, digital freedom without digital responsibility is contributing in creating new challenges for Pakistani society.
