- f) A good source for public to get rights

5. Way forward to balance the pros and cons of digital platforms as a new battleground for free speech

- a) Regulatory law at national level
 - b) Limited access
 - c)
6. Conclusion

Introduction

It is nature of human that it prefer free life over restricted one.

In compliance with this natural character people have utilized the golden opportunity of free speech at digital platforms. Digital platforms have become new battlefield for free speech as a result of globalization.

Globalization has facilitated interconnectedness of every corner of the world. In addition to globalization technological innovation has created these digital platforms for facilitation of ^{direct} communication. This communication has been widely successful in achieving the targeted goals. In the modern world ~~order~~ digital platforms are ~~providing~~ playing significant role in shaping politics, governance and ideologies. There is no law and restriction to limit the expression of free speech on these platforms. They are borderless and have no boundaries people from any where can join them at any time.

even without ~~there~~ exposure of their original identity. It has both pros and cons. It can lead to social unrest and lawlessness as these platforms are open for everyone. In case of violent rhetoric these platforms with free speech can pose threat to national security and stability. Additionally their ^{negative impact} ~~base~~ is not just limited to national or state level they can become an international threat. Despite of its sensitivity it ~~can~~ has a very positive role in leading revolutions and provide a good source for public to take rights they deserve. By reviewing the causes and ^{potential} consequences of digital platforms as new battlefield for free speech, laws should be introduced at national and international level to regulate the use of these platforms and limit its access to the sensitive regions.

Digital platforms are the creations of technological innovation and globalization. They have become a significant element of globalization. They help the world to connect in every aspect. They are easily accessible ~~to~~ to everyone ^{having} ~~with~~ internet connection. They are good sources of communication and free expression of ideologies. In a nutshell, they provide a borderless and unrestricted platform for free speech.

Technological innovation has a significant role in free speech at digital platforms. It has resulted in the birth of various platforms like WhatsApp, Instagram, YouTube and Twitter etc. Due to their accessibility, people prefer its use to express their ideas and deliver free speech over other sources such as physical gatherings at community level. Currently ~~about~~ 5-10 major platforms with hundreds of other private and decentralized platforms are

operating. Hence technological innovation is the backbone of these digital platforms available for free speech.

In addition to technological innovation another important factor is globalization. It is ~~the~~ a significant and most prominent element of the current world order. Globalization is the need of survival which has resulted in the emergence of these digital platforms which are contributing to the connectivity of each part of world. The ~~gaza~~ ^{digitally} genocide is the first ever ~~gen~~ documented genocide opposed by the free speeches worldwide. Though globalization has paved a path for free speech at digital platforms.

Apart from globalization successful outcome of free speech at digital platforms is another factor. These platforms provides a common place to individuals

sharing common ideas and goals. When the individuals with common ideology and thinking gather at same platform digitally, they create a large force to implement ~~the~~ and expand their ideology, it results in practical implementation. In 2025 a digital revolutionary campaign ~~lead~~ led to the regime change in Bangladesh. Hence the successful outcome of these type of revolutions and other moments encourages ~~the~~ digital platforms to become battlefield for free speech.

In addition to effective outcome digital platforms are unrestricted. There is no law to regulate operation of these platforms. As they provide free access any one regardless of age, profession, region, culture, and ideology can have an approach. BWA an active terrorist organization in Balochistan exploits these digital platforms for the propagation of their ideology. Hence the ~~unlimited~~ unrestricted approach has a significant role in demonstration of digital platforms as battlefield for free speech.
