① How does the author characterize the nature of human Memory?

Human memory is the reflection of ideas, beliefs and emotions of an individual at time. The memory not only shows the past experiences but also the current observations, attentions and identity. Therefore, it is considered as reconstructive, selective and retrospective.

② Why is memory described as both reconstructive and selective?

The memory is described as both reconstructive and selective because it is based on the ideas, beliefs, emotions, attentions and observations of an individual at time that are different in individuals and reflections of the

③ What role does collective memory play in shaping societal understanding?

→ Collective memories reflect the culture of a society that help in understanding of past experiences and history of that society.

DATE: _____

DAY: _____

- ④ How do emotion and perspective influence memory according to the passages?

The memory is the reflection of the emotions such as fear, joy, anger and the perception of individual existence and culture of a society. These emotions and perceptions help in determining the past situation and shapes the memory.

- ⑤ Why is memory considered inseparable from identity?

Memory is considered inseparable from identity because it is actually the reflection of the own existence and intension toward a society.
