Her ingenious plan helped the company save millions of rupees.

title: The Perils of Over-Specialization

The modern obsession with expertise has fragmented knowledge, leaving humanity incapable of addressing complex, interdisciplinary problems. Specialists, though highly skilled in their fields, develop narrow perspectives reducing human beings to economic, biological, or psychological constructs. Treating these partial truths as complete leads to mismanagement of issues like climate change, which require integrated approaches across scientific, economic, political, and cultural domains. ~~Exer.~~ Excessive reliance on experts has also undermined common sense, making people passive consumers of technical advice in matters of daily life. While specialized knowledge is indispensable, it must be subordinated to a broader understanding of human life and values. Education should foster the ability to connect ideas across disciplines and ~~in~~ cultivate ordinary intelligence. Only by restoring holistic thinking can society avoid becoming a civilization of experts, brilliant in details yet blind to the larger picture.
