Title: A broken mirror of our intellectual world

Precis: Dependency is a root word in modern world where humans are binded to reflect every moment and event to their respective specialist rather than using their own intellect. Humans are categorized in multiple sectors of specialists where a specific problem is healed by the respective specialist. From Economists to psychologists, humans are over dependent on specialists. Institutions that are back-bone of human development are emphasizing more on specific field rather than general and common development. Minds are less generative and over-dependent. However, we need to turn this dependence to innovation and smart minds, we need people with collective knowledge, we need curriculum where every suitable study presented to human development and we need a society free from dependence and over-reliance to specialists. This reforms turn civilization of experts who know everything about less to brilliants and sharp-minded experts.
