Subject: Precis & compositionQuestion No. 02Answer:-

Title: Humanity: concerns
of Experts and Youth

In modern era, human beings faces challenges and their inability to overcome these issues creates a barrier. People follows those who are efficient in their job but they only presents views related to their specific job. For instance, an economist categorizes humans as rational being, an biologist portrays the picture of humans on the basis of their genetic components, and an psychologist observes the human behaviour. The nature of these jobs

cannot reflect the whole truth-

The another example is climate change, although it is a global problem but different experts explains this issue in their own way. Moreover, today's world cannot fully capture the perception of truth. The blindness of humans pushes them to carry out the weightage of different opinions and excludes whole truth in this case. This dependency moves a person from the status of citizen - To reject expert's opinion is not an authentic step but the only way to understand the meaning of life is to embrace the truth regarding specific issue.

Schools and universities provides a clear path to students and they can achieve broader views as well - Similarly, one's can make decisions by information

and views shaped by culture.
