

Q No 1

Author characterizes memory as selective, reconstructive and emotional. He also says that memory stores life time events.

Q No 2

Memory is described both as reconstructive and selective because it only remembers some events and also changes rationale of a man. For instance on returning a family tour, every member remembers moments according to his or her emotional status and interests. At last observation enhances reconstructive nature of memory.

⊖ NO 3

Collective memory plays role in shaping social understanding. Because collective memory depends upon ~~at~~ individuals beliefs collectively and social frameworks. Moreover, societies learn from culture and customs about past and adopt some experiences by ignoring others.

⊖ NO 4

Emotions and perspective influence memory in a way that individuals remember those moments differently which are associated with phobia, happiness and embarrassment than ~~as~~ normal moments.

⑤ NO5

Memory is considered inseparable from identity. Because individuals tell those stories which reflect both past ~~and~~ ~~previous~~ events and current situation. So memory is considered inseparable from identity.

⑤ NO3
