Moreover, influencers on social media are responsible for bringing changes in societies by promoting ~~it~~ trends. These trends can be positive as well as negative. But nowadays negative and unnecessary trends dominates. Influencers promotes unnecessary trends such as increase in functions and customs with in weddings. by promoting extravagance. This defamation causes loss and distraction of image that they had struggled for many years in building and forming. Furthermore it also causes distress and anxiety among victim of such defamation and they find it hard to continue their business with the same passion. For example, Defamation and mock content spread by Pakistan's influencers against "delivery boys".

Furthermore, the most posing issue is distraction is rising day by day among youth, who are widely following those influencers who are promoting culture of westernization and unnecessary content. Many students are distracted

From their studies. Despite shaping the young minds and counselling them to adopt useful profession that can put Pakistan on the path of success, they spreads unwanted, useless content, disturbing their mental health and growth. They left behind their aims and goal and start indulging in unwanted social media content such as making tiktoks, buying and online shopping.
