QUESTION:- 1

1. How does the author ?

1 The author characterizes the nature of human memory by considering it archive of human experience but away from repository of facts.

2. Why is memory described --- ?

0 The memory is described as both reconstructive and selective because it memorizes some moments and keep changing them according to current thinking.

of human.

3. What role does collective ...?

Collective memory depends on individual narratives and broader social frameworks. They emphasize on experiences by commemorations, rituals and oral tradition in past.

4. How do emotion and ...?

The emotion influence memory by intense fear, joy or shame. The combination of subjectivity, reconstruction, and social influence means that memory is both personal and communal phenomenon.

5. Why is memory considered ... ?

0 The memory is considered inseparable from identity because the stories which human narrates about himself is different from which he lives.
