Education is a key to unlock the doors of freedom, and peace. Educated people know the importance of peace, strategies and rules of the state. Balochistan is one of key province of Pakistan, peace is undoubtedly possible with the notable representation of people, equal resource allocation (Gas, Oil and Energy). Those who are anti-stater must be given equal rights and better chances as per the laws of state. Female education and empowerment is another pre requisite for peace in Balochistan.

Secondly, the more investment on Human development results in desired result. People will get the proper representation and better job opportunities and can become the key part of the state. Human development is directly proportional with the peace index everywhere. Not only Balochistan but everywhere the same situation is valid.

5

people ~~not~~ after getting proper rights and development path can share the noteworthy role in the advancement of state.

There is a need to ensure the better civil military relations that ultimately lead towards the peaceful and prosperous outcomes in Balochistan. Balochistan no doubt needs immediate steps for the civil-military strong relations to build the peace. Peace is a right of all the people being the part of state. Now, this becomes the responsibility of the state to ensure peace through civil-military relations.

Proper Education is the most essential and the leading factor to bring peace in Balochistan. There are millions of examples in the history of the world, where peace became possible through proper education and technology.

6

During the struggle of separate homeland, Muslims first took educational initiatives and ultimately with education, debate, right ways and struggle they got a separate state.

Japan after American Nuclear attack, became successful in developing peace and prosperity, that ~~was~~ became only possible through proper education and the technology. So the people of Balochistan needs proper education and the technology to bring peace.
