A strange paradox has been created in human intellectual life. The new concept of expertise. Due to knowledge becoming more specialised, the humanity finds itself less able to confront the problems. The humanity turns to different experts of life to get the solutions of their problems despite knowing that being an expert in a single discipline does not make an individual wise about life. So Everyone views the world through the lens of their discipline. Each lens discloses something true, and such hides something important. The splitting of knowledge makes it difficult for humans to solve problems. A single is dissected as political, economic, scientific, moral, and cultural problem, and every experts explain in a way that humanity does not understand.
