Essay

After World War 2, the establishment of international organisation i.e United Nation set lead the foundation of modern corept of ## human rights. These human rights includes the individual rights to freedom of speech and freedom of enpression. which continued for the digital world as well. But along with a spread of digital at social media accounts, challenges also gain spikes. Digital freedom refers to the freedom to access information, access the internet and digital platform freely, and to expree opinions online without undue censorship, surveillance or discrimination

Whereas, digital responsibility means ethical and lawful use of digital technologies. However, in Pakistan, with increasing numbers of digital techonogy users, challenges steming from them are also elevating. Some of there challenges are spread of mis--information and false news, online harasment, data breach and extremist content. Nevertheless, the awarness about the challenges and is limited. Therefore, state level engagement is necesary in order to addren there challenges Hence, digital freedom without digital responsibility is contributing in creating new challenges for Pakistani society.
