

GENERAL FEEDBACK FOR ESSAYS

Date: _____

Day: _____

Content (40%)

Your interpretation should be in depth, comprehensive and academic.

Always address the asked part. It should be evident in your outline, which should be self-explanatory in nature. Essays/Outlines that give related information without addressing the asked part do not qualify.

The whole essay should be relevant. Even if 1-2 arguments are irrelevant the essay will not pass.

Distribution of topic should be according to the demand of the topic statement i.e. if there is one scoring point it should be given more weight, if there are 2 or specific scoring points all should be given equal weight.

All claims made in the essay must be substantiated. Out of 15-17 arguments at least 9-10 should be academically backed with proper references. The rest should be backed by either case studies or generally known information.

Evidence must be authentic and come from proper and authentic academic sources. Newspapers do not qualify as an academic source. Illustrations and vignettes of events do not qualify as academic evidence.

Essays that are lacking in evidence do not qualify.

LANGUAGE (25%)

Focus on enhancing your grammar as any essay with 4-5 grammatical mistakes does not pass.

Your essay must be in the tone and tense of the topic statements. Essays that fail to comply do not pass.

Your sentence structure should be simple, yet clear and diversified.

Vocabulary used should be simple, clear and concise. Expression should always be formal and academic.

You are never to write in 1st and 2nd person pronouns.

You must always use the given keywords and your topic for your thesis statements and main headings in your outline.

High reserves linked with a strong exchange rate (IMF)

Aid for developmental projects promotes social stability by catering to employment needs.

INTRODUCTION: The introduction is the longest paragraph of the essay, at least 200 words. It should start with a hook, must give the glimpse of what's to come and must have a thesis statement. Besides hook, your introduction should not have any sort of information and reference. Avoid definitions in introduction.

Report

3.4 Aid for mitigation and adaptation against climate change promotes environmental stability
→ Green Climate Fund under COP 27

3.5 Aid for education and health enables human development stability by improving quality of life
→ Case study of Vietnam

3.6 Foreign aid ensures political stability by averting recessionary pressures on economy
→ Aid boosts economic growth amid recession (Financial Times)

3.7 Aid for technological development prompts innovation and digital stability
→ Huawei's Silk Route Digital Project (Reuters)

3.8 Aid for defense and military equipment purchase enables security stability
→ US aid to Israel for "Iron Dome" (Financial Times)

4. FOREIGN AID IS A RECIPE FOR DISASTER: A COUNTER PERSPECTIVE

4.1 Foreign aid creates a cycle of dependence for receivers
 → IMF programs for Pakistan
 (Business Recorder)

4.2 Aid as a means of control leads to a loss of sovereignty of receiver
 → Asian economies crisis by IMF policies (Reuters)

IMF programmes do not classify as aid.

4.3 Aid with binding commitments harms national foreign policy
 → Pakistan-Iran pipeline projected halted amid US aid
 (The Economist)

5. PATHWAYS TO TRANSFORM AID INTO A MEANS OF STABILITY AND AVOID DISASTER

5.1 Limiting acceptance of aid backed with binding constraints

No suggestions in an argumentative essay.

5.2 Regulatory bodies to ensure efficient spending of aid

5.3 Long term economic planning placing aid as a temporary measure

6. CONCLUSION

Every era is defined by a force that reshapes how societies produce, govern, and imagine their future. In the 21st century, that force is not confined to a single domain - it spans economies, technologies, and entire systems. Currently, this force is manifested in the form of foreign aid. In modern economies, aid serves as a multi-dimensional tool impacting broad domains. For one, it serves as a primary measure to stabilize failing economic regimes by improving currency value. Similarly, foreign aid translated into developmental projects enables human development. It improves quality of life and generates employment, further adding to social stability of a nation. Moreover, foreign aid remains essential in the fight against climate change and promotes stability by improving environmental

contemporary world, several organizations exist that provide aid to struggling nations. Majority of the aid is targeted around human development and social indicators. In a world with massive inequalities, aid serves as a tool to promote balance and stability.

To start off, aid enables the rehabilitation of disaster prone regions. This remains essential especially for developing countries that face financial constraints amid post-disaster recovery.

In such situations, foreign aid helps to accelerate the redevelopment process. This ~~was~~ is highlighted in a World Bank report that claims foreign assistance is linked with approximately 15-20% decline in recovery time. Financial assistance in a crisis helps speed up response and recovery, thus serving as a primary tool towards stability.

Additionally, foreign aid stabilizes economies by increasing reserves. The exchange rate of a nation is volatile to changes in the foreign reserves. Economic woes and low foreign currency destabilizes the exchange rate of a nation. According to a report by the International Monetary Fund, high currency reserves is linked with a strong exchange rate, thereby improving economic systems. By stabilizing the exchange rate of a country foreign aid promotes economic stability.

Furthermore, foreign aid drives developmental projects within a country. Such projects generate employment for a growing population, generating incomes. The International Monetary Fund Developmental Outlook Report signifies a reduction in poverty levels of developing nations.

Day: _____

Maintain consistent paragraph length throughout the body paragraphs.

Date: _____

amid aid-backed projects. Such projects thus remain integral by promoting social stability and through employment and income opportunities.

Moreover, foreign aid serves as a major tool to fight against climate change. Many countries face persistent threats and require massive funding towards mitigation and adaptation needs. The Green Climate Fund serves as an institution for aid pertaining to resilience against climate change. It has sponsored 100+ projects in numerous countries to adapt to threats and ensure mitigation of disasters. By providing aid for mitigation and adaptation needs, nations move closer to environmental stability.

So? How does foreign aid help?

In addition, aid in the form of education and health promotes human development. By improving literacy and

availability of basic facilities, aid improves quality of life of the populace. The example of Vietnam stands as a case in point. It leveraged aid by investing in its educational infrastructure. Currently its literacy rate is one of the highest in the world at above 70%. according to a report by World Bank. The services improve quality of life and enable human development, thus placing aid as a measure of stability.

Like wise, foreign aid stands as an important tool to avert recessionary pressure on economies. Countries that face a fiscal or balance of payments crisis often face recessionary and low growth constraints. In such scenario, aid boosts economic growing and helps balance financial accounts of a nation. The growth translates into an anti-recessionary

force and maintaining economic balance. Therefore, by promoting growth and improving overall balance of payments of a country, aid provides stability of the political dynamics of nations.

Additionally, aid used in technological development prompts innovation within society. The funding speeds up digitalization of economies and supports modernization of systems. The "Huawei Digital Silk Route" stands as an example. By providing funding to various companies, the platform is aiding digitalization and upgradation of networks across the globe. This maintains strong networks and faster data transmission, serving as a means of digital stability for low-income countries, placing aid as a road to stability.

Finally, aid for defence and military spending ensures security of nations. Foreign aid funds defence systems

and procurement of advanced systems thereby improving the security infrastructure of receiving countries. The United States, according to a Financial Times report, send billions of dollars in aid to Israel to fund their security. The Iron dome, Israel's main security machinery, is funded through it against foreign threats. Aid, thus, improves security stability by providing means of weapon systems procurement and advancement.

Opponents of the argument, however, contend that foreign aid creates a cycle of dependence for receivers. This is put forth with the example of Pakistan which has had 24 programmes by lending institution of IMF. However, according to a PIDE policy report, Pakistan's dependence is driven by structural and policy driven constraints rather than the aid itself.

The dependence is tied to inefficient use which creates conditions for more support, ^{No} ~~argumentation~~ thereby rebutting the argument of aid as a recipe for disaster.

Opponents further claim that aid is used as a means of control over receiving nations, leading to a loss of sovereignty. This is referenced with the Asian Economic Crisis where IMF driven programmes resulted in a recessionary cycle. However, according to findings of The Economist, the crisis was a result of corruption within the governmental frameworks. The misuse of aid, ~~thus~~ turned an ~~opportunity~~ into a crisis, thereby refuting the claim of aid as a disaster rather than stability.

The previous arguments articulated the importance of aid as a means for achieving stability. The next section

of this essay will explore the pathways to transform aid into a force for stability, rather than a recipe for disaster.

~~Limiting~~ Limiting the acceptance of aid backed with binding arrangements serves as a key measure, to prevent instability. Foreign funding often comes with certain controls and requirements under which it is released. Thus, a mechanism for reviewing and accepting aid is essential. Many countries have strong review systems and selectively accept aid, thereby increasing stability and limiting onset of disaster.

In addition, the development of regulatory bodies is essential to promote efficient spending of aid. Strong tracking mechanisms prove a useful tool to oversee the aid spending and maintain transparency. Carbon tracking and

climate budget tagging serve as modern methods for climate change related spending. Thus, strong regulatory bodies enable the use of aid for stability rather than disaster.

Finally, long term economic planning is integral for sustainable economies. It helps place aid as a temporary measure rather than sole reliance. By creating a long term economic plan, and strategically placing the onset of foreign aid, dependence can be minimized and funding used wisely. Thus, planning remains essential for the use of aid as a mode of stability rather than ~~one~~ a recipe for disaster.

To conclude, amid the ensuing global financial dynamics and inequalities, foreign aid has emerged as a tool of hope. It

not only helps balance out systems but also ensures a transformation of lives through development. It helps drive security of nations and removes vulnerabilities posed by natural or anthropogenic factors. Foreign aid presents itself as a means to achieve stability across numerous domains. While it carries certain flaws, policies and reforms ensure the sustainable use of foreign aid. By leveraging external assistance to bridge gaps, strengthen economies and drive transformation, aid paves the path for stability rather than disaster.
