- (4.3) Awareness campaigns
- (4.4) Economic aid for deserving families
- (4.5) Ensuring strong enforcement of laws

(5) Conclusion:

The Essay

Child Labour is a social prevailing issue especially in the developing countries facing Economic Crisis.

In Pakistan alone, 2.6 million children are out of school. These children faced with social, economic and political challenges are forced to quit schools and start earning at a young age. The innocence of a child is lost in the tensions

of world. The days of childhood, where they should be living carefree, laughing, doing

mischief and enjoying themselves, are made to the injustices and cruelties of world. The soft hands of the children which were meant to hold pens and write are stained, rough and

carrying out labour. Child Labour is commonly prevalent in workshops, factories, houses and

construction. The major causes of child Labour include illiteracy, poverty, overpopulation, weak

Legislature, cheap Labour force and misconception of treating Labour as a skill, these consequently

give rise to increased crime rate in the society, violation of human rights, lack of

productive youth and children suffering from psychological traumas. However, these affects

can be reduced by enforcing governmental laws, promoting quality education, launching

Awareness campaigns and providing economic aid to deserving families.
